NATURE TRAIL

Both the responsibility we feel towards the environment and our company's strategic orientation for the future are reflected in the 1 kilometre long nature trail weaving its way around almost all the numerous production and storage buildings in Haßmersheim. The nature trail is flanked by eleven stations: two wild hedges, a wild meadow, a pond biotope, an insect and amphibian house, a kestrel hut, a bat colony, a rainwater collection tank, a wetland biotope, an orchard and even a brown owl complex. The trail provides the first visible expression of the more than thirty years we have spent actively working to protect nature and the environment.

Our company manufactures efficient, multi-purpose and environmentally friendly products in a working environment with a demonstrable ecological balance. As the presence of more than 2,000 animals and over 4,000 plants shows, the company site's natural surroundings are fully intact – we carry out our day-to-day business activities in harmony with nature.

DISTEIN QUALITY BY European Aerosols

With an annual turnover of around 189 million € and a total group-wide workforce of 220, European Aerosols is by far number one in Europe when it comes to spray paints and touch-up pens. The long-standing family business places great emphasis on the safe and environmentally friendly use of resources. Ongoing investment in environmental protection work, regular modernisation of facilities and equipment, and qualified employee training form the basis of the organisation's ever-increasing success. Our high quality standards are upheld by certified pro-

duction processes designed in accordance with the DIN EN ISO 9001, 14001 and 50001 management systems; these standards help to ensure that every precaution is taken regarding user safety. More than 60 years of experience in the aerosol lacquer industry have honed staff expertise and shaped company traditions – traditions which we will continue to successfully uphold.

DISTEIN FOREST MARKING PAINT

We are especially proud of our DISTEIN forest marking paint. Through working in close connection with many different forestry offices, we developed our forest marking paint as an environmental- and user-friendly solution specially designed for the various applications in the forestry and lumber industries. Over 1,000 German forestry districts were involved in this development process. We hope that you too will continue to place your trust in top product quality and innovative technology direct from the manufacturer.

DISTEIN® **NEON** FOREST MARKING PAINT

Can variants:

STANDARD CAN

ERGONOM CAN

Fields of application:

Their intense brightness make DISTEIN neon colours ideal for use in marking trees for harvesting. A special writing spray nozzle also makes the neon paints highly suitable for labelling lumber stocks.

Characteristics:

- Awarded the KWF approval mark
- Intensely bright paint colour for marking trees for harvesting
- Weather-proof; adheres well even with humid subsoil or in direct sunlight
- Optimal covering properties
- Frost-proof to -20° C
- Minimal atomised spray
- Special writing spray nozzle allows perfect spray control for precise lumber stock labelling
- High spreading rate
- 100% guarantee to empty the spray completely thanks to self-cleaning valve, thereby allowing easy disposal in Green Dot (Grüner Punkt) facilities
- Environmental-neutral propellant
- Patented colour ring simplifies colour identification
- A high-quality „Made in Germany“ product

Standard can 500 ml

	Art. no.	Description	Size	EAN
	647949	neon red	500 ml

DISTEIN® **PERMANENT FOREST MARKING PAINT**

Can variants:

STANDARD CAN

ERGONOM CAN

Fields of application:

DISTEIN permanent paints were developed especially for markings that are intended to remain visible for a very long time. This makes Distein permanent forest marking paints especially suitable for marking logging trails and future trees.

Characteristics:

- Awarded the KWF approval mark
- Permanent paint for marking future trees and logging trails
- Weather-proof; adheres well even with humid subsoil or in direct sunlight
- Optimal covering properties
- Frost-proof to -20° C
- Minimal atomised spray
- Special writing spray nozzle allows precise spraying and exact labelling
- High spreading rate
- 100% guarantee to empty the spray completely thanks to self-cleaning valve, thereby allowing easy disposal in Green Dot (Grüner Punkt) facilities
- Environmental-neutral propellant
- Patented colour ring simplifies colour identification
- A high-quality „Made in Germany“ product

DISTEIN® FOREST MARKING PAINT **360°**

Fields of application:

DISTEIN forest marking paint with ergonomic spray cap and a 360°-valve ensures a accurate lettering in every position and direction. Our 360°-marking spray was especially developed for markings in narrow angles and corners.

Characteristics:

- 360°-valve ensures a accurate lettering in every position and direction.
- Intensely bright paint colour for marking trees for harvesting
- Weather-proof; adheres well even with humid subsoil or in direct sunlight
- Optimal covering properties
- Frost-proof to -20° C
- Minimal atomised spray
- Special writing spray nozzle allows precise spraying and exact labelling
- High spreading rate
- 100% guarantee to empty the spray completely thanks to self-cleaning valve, thereby allowing easy disposal in Green Dot (Grüner Punkt) facilities
- Environmental-neutral propellant
- Patented colour ring simplifies colour identification
- Can be used with DISTEIN metal spray grip
- A high-quality „Made in Germany“ product

Ergonom can 500 ml

	Art. no.	Description	Size	EAN
	375132	neon red	500 ml	 4 048500 375132
	382949	neon orange	500 ml	 4 048500 382949

	375163	neon green	500 ml	 4 048500 375163

*DISTEIN forest marking paint with ergonomic spray cap for fatigue-free extended spraying even without spray grip.

KWF certification

QUALITY BY European Aerosols

The Kuratorium für Waldarbeit und Forsttechnik e.V. (KWF) is the main centre of expertise for forest operations, forest technology and lumber logistics for Germany and the rest of Europe. The approval mark documents which attributes were evaluated and on what date; in the forestry world, it is seen as a badge of demonstrated value.

Our DISTEIN forest marking paints underwent a comprehensive evaluation in the year 2006. Among other things, the evaluation assessed important characteristics such as spreading rate, handling, permanency, and health protection. Ergonomic, environmental, and financial aspects were taken into consideration. Both the neon and the permanent paints were awarded by the KWF approval mark following the assessment. DISTEIN forest marking paints were among the top scorers in several areas of evaluation. Since autumn 2014 our DISTEIN ECO spray is also awarded with the KWF approval mark.

Our in-house research and development department continually works to improve our products even further in terms of environmental and health protection. As early as 1975, we became the first European company to begin voluntarily to use non-ozone-depleting propellents. Our products have now been completely free of toxic heavy metals for 28 years. Furthermore, our containers are all completely recyclable, meaning they are permitted to bear the Green Dot (Grüner Punkt) label. At the end of 2007, the DIN EN 14001:2004 integrated environmental management system was introduced at our Haßmersheim and Schwerte sites. This led to the further optimisation of the ecologically oriented production processes we had already been practicing for years: not satisfied with merely meeting the required standards, we went on to exceed them.

In 2010 we proceeded to earn certification according to DIN EN 16001:2009, the newest standards for energy management.

The DIN EN ISO 16001:2009 has been replaced in 2012 by the DIN EN ISO 5001. The DIN EN ISO 5001 consists of further requirements in sectors of energy management.

From 1 January 2022, with re-certification for a further five years, a new KWF logo has been introduced. It contains the word professional, which expresses exactly what we stand for: Quality for the professional.
